**Subject:** FW: DR Summary  
**Attachments:** Designated representative summary v2.docx

Got this from Rick, however on my quick review, it seems that these 5 states that have a DR program, don't seem to use a state person at all.

Perhaps I'm missing something and Rick has the answer we need.

WA: Uses "designated representative" but does not give a definition.

OR: Any persons designed in writing by a worker or handler to exercise a right of access on behalf of the worker or handler to request and obtain a copy of the pesticide application and hazard information required by Sec. 170.309(h) in accordance with Sec. 170.311(b) of this part.

TX: The individual or organization to whom an agricultural laborer gives written authorization to exercise the laborer's rights under this chapter. A recognized or certified collective bargaining agent shall be treated automatically as a DR without regard to written authorization from a laborer.

FL: Any organization or person to whom a worker gives written authorization to exercise the right to request the agricultural pesticide information pursuant to this part.

CA: (from equivalency documents) Current 3 CCR sections 6723 (d) and 6761(d) already use the term "employee representative" to identify persons allowed to access pesticide safety information on an employee's behalf and therefore it is not necessary to include this term in section 6000.
